Anil Anuragee

Full Stack Developer | React.js · Node.js · TypeScript · AI Integration
Indore, Madhya Pradesh, India • 8349283228 • anilanuragianuragi712@gmail.com • LinkedIn: anil-anuragee

SUMMARY

Full Stack Developer with 3 years of experience building production web apps and AI-powered features using React.js, Node.js, TypeScript, and MySQL, with experience deploying via Docker/CI/CD and using Redis for caching. Currently at Aripra Infotech, building backend systems and AI pipelines (Google Gemini AI, audio processing) behind Audiofy, a call/desk-recording analysis platform.

SKILLS

Frontend React.js, Next.js, TypeScript, JavaScript, Material-UI (MUI), Tailwind CSS, HTML5, CSS3

Backend Node.js, Express.js, REST API Design, Socket.io (real-time services)

DevOps & Tools Docker, CI/CD (GitHub Actions), Redis, Git & GitHub

AI / AI Tools Google Gemini AI (prompt-driven analysis), Parakeet (transcription), NeMo/Sortformer (speaker diarization), CAM++ (voice-print identification); also use Claude & Claude Code in development workflow

Databases MySQL (schema design & query optimization), MongoDB, Redis

Cloud & Tools AWS, Docker, CI/CD pipelines, Git & GitHub, Responsive Web Design

PROFESSIONAL EXPERIENCE

Aripra Infotech Pvt. Ltd. Apr 2025 - Present
Software Engineer · Full-time *Indore, Madhya Pradesh, India*

- Own full-stack feature development for internal AI products, working across TypeScript/React.js front ends and Node.js/MySQL back ends.
- Design and optimize MySQL schemas and queries to support high-volume audio analysis workloads.
- Build backend APIs powering AI-driven audio analysis pipelines — transcription, diarization, and Gemini AI-based scoring — used in production across the company's client base.
- Core contributor to Audiofy, our AI-powered call and desk recording analysis platform, from initial architecture through production release (details below under Key Project).

Docusoft Solution India Pvt. Ltd. Sep 2024 - Apr 2025
Full Stack Developer · Full-time *Indore, Madhya Pradesh, India*

- Owned front-end development for multiple web application features for UK-based clients, working directly with product stakeholders to translate requirements into production UI.
- Built a reusable component library in React.js, reducing duplicate UI code across features and speeding up delivery of new screens.

Next Gen Tech Services (NGTS) Sep 2023 - Sep 2024
Full Stack Developer · Full-time *Indore, Madhya Pradesh, India*

- Owned end-to-end delivery of full-stack features — from API design to UI implementation — using Node.js and React.js, with consistent API contracts to reduce integration issues.
- Delivered accessible, responsive web solutions for client-facing products, improving usability across page templates.

KEY PROJECT — AUDIOFY

AI-Powered Call & Desk Recording Analysis Platform

Aripra Infotech Pvt. Ltd. | Our product, built for internal and client use

Stack: React, TypeScript, Node.js, Express.js, MySQL, Redis, Docker, Socket.io, Material-UI (MUI DataGrid), Day.js, Google Gemini AI, Parakeet (transcription), NeMo/Sortformer (speaker diarization), CAM++ (voice-print training)

- Contributed as a full-stack developer to Audiofy, our AI-powered platform analyzing call and agent desk recordings to drive performance, compliance, and business insights across multiple client accounts.
- Built backend services (Node.js/Express, MySQL) to ingest call recordings via telephony webhook integration and desk recordings from an in-house Desk Streamer app, processing a high volume of recordings daily.
- Built the audio-to-insight pipeline — transcription (Parakeet), speaker diarization (NeMo/Sortformer) — feeding structured text into Gemini AI for call type identification, compliance checks, and conversion tracking, reducing manual call review effort for supervisors.
- Developed an agent scoring engine (greeting, engagement, objective handling) with CAM++ voice-print training achieving 90-95% speaker identification accuracy, plus real-time Socket.io streaming and role-based admin dashboards (MUI DataGrid).
- Used Redis to cache frequent queries and manage job/leaderboard updates, and deployed services with Docker inside a CI/CD pipeline to streamline releases.

EDUCATION

Shri Krishna University, Chhatarpur (M.P.)
Bachelor of Technology, Computer Science Engineering — Grade: A+
